

Capability Statement

Diesel Generation Australia is a purpose-built company for Power Generation. DGA specialises solely in power generation with three divisions operating under the DGA Banner, Sale, Service and Rentals, which is offering Tasmanian Companies and people the missing link in power generation here in Tasmania. The Sales division offers generating sets from 10kVA through to 3500kVA along with automatic mains transfer switches, remote monitoring and fuel storage and installation - these are all the key components for emergency standby systems. The Service division of DGA has the ability not just to service your equipment, but also to carry out any form of installation with regards to the generating set, from electrical works to fuel tank installations and remote monitoring. Our Service arm is on board to ensure that all issues can be sorted out by service crew 24/7. DGA owns its own load banks for testing generators for fault finding or for running on standby power generators, which are unloaded most of the time. DGA carries out annual testing for clients who need their high-quality standby units to run as per manufacturer spec. DGA Service also offers 24/7 refuelling.

One of the directors, Richard Manning, is also a qualified diesel technician with over 20 years' experience in the power generation industry. His ability in this industry is second to none.

The DGA rental arm, DGA Rent, has a fleet of over 40 generators at our Cambridge facility, offering temporary power from 10kVA through to 1100kVA. DGA Rent also offers power distribution hire along with load bank hire. Our diesel tank range for hire is also very large with the ability to assist with bulk fuel storage onsite, and our portable diesel tank has 10,000 litres of storage available.

Diesel Generation's reputation is growing every week, now with facility work and sales within the following:

- Tas Fire Service
- Australian Broadcasting Commission (ABC)
- Aquaculture Tassal & Huon Aqau / Petuna
- Calvary Health Services
- Falls festival
- Tasmanian Health Service
